lo jboce'u

de'i li 2026 pi'e 10 pi'e 2

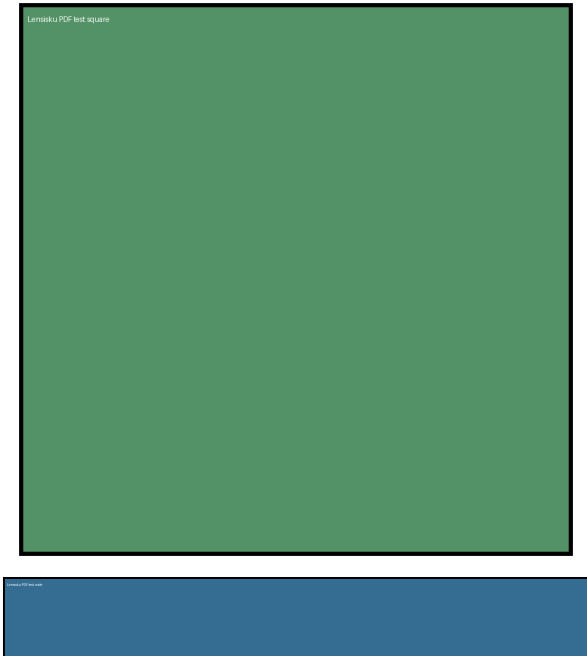

PDF check: wide front and portrait back These images must remain inside their column without overlapping this definition or each other.

△ **zi'u [LAhE]** the referent of itself; guards the scope of the sumti — Used for sumti that are hard to limit the scope of outer quantifiers for and where *lo'e/le'e* is inappropriate. E.g. '*cange fo zi'u lo vanjba*' where the scope of '*lo vanjba*' needs to be self-contained. Alternative to the *xorlo* reform. Equivalent to '*la'e lu'e*' and '*do'e ku SUMTT*' with the semantics of *do'e* removed. **Collection note:** Local PDF check: dictionary definition with two images.

PDF image check 2 Definition text stays with its attached images when the entry fits the current column.

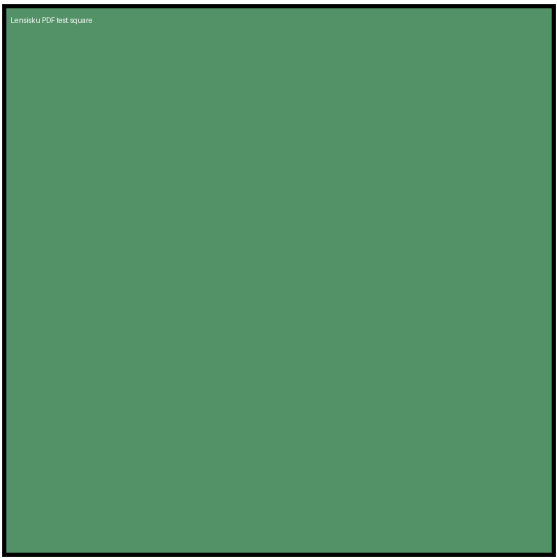

PDF image check 4 Definition text stays with its attached images when the entry fits the current column. Definition text stays with its attached images when the entry fits the current column. Definition text stays with its attached images when the entry fits the current column.
